**LIVE THE COAST LIFE**

## WHY CHOOSE US?

Keesler Medical Center has approximately 60 beds, 10 of which are ICU beds along with 50 medical/surgical beds.

## ABIM Board Pass Rate

This program has been described as "small but intense" due to its rigorous training combined with personal attention from the faculty. This has resulted in 97% rolling 3-year pass rate and many graduating residents going on to various fellowships.

## ABOUT THE MISSISSIPPI GULF COAST

Nestled between New Orleans, Louisiana, and Mobile, Alabama, there are 62 miles of scenic coastline just waiting for you to explore!

Keesler Medical Center is located in the heart of Biloxi, MS, on the Mississippi Gulf coast

### 1 Excellent Didactics

Morning report and noon conferences led by a subspecialist or staff internist reviewing high yield information every resident needs to know.

### 2 Unopposed Residency

The low resident to faculty ratio fosters an environment where residents form longitudinal learning relationships with dedicated internal medicine and subspecialty faculty, most of whom have an "open door policy" to answer questions as they arise.

### Procedures

3 Most residents are signed off on many inpatient and outpatient procedures to include thoracentesis, paracentesis, arterial lines, and central venous line placements by the end of their first year.

### 4 Research

Get involved with many current ongoing research projects. Each year, residents have the opportunity to present at local and national symposiums, completely funded by the program.

### 5 Clinical Experience

In addition to clinical rotations at Keesler Medical Center, as a PGY-3, residents have the opportunity to do a hospitalist rotation in Landstuhl, Germany. Residents also rotate at University of Mississippi Medical Center for ICU, Cardiology, and Hematology rotations. These rotations provide residents with a unique opportunity to see diverse pathology and practice extremely high acuity care.

### 6 New and Noteworthy

- A partnership with Singing River Health System for ICU and hospitalist rotation experiences and training.
- Integrated longitudinal point of care ultrasound curriculum.

### Other Attractions:

- Mouthwatering seafood and southern cuisine
- Great deep-sea and freshwater fishing
- Local breweries
- Concerts and Music Festivals
- Mardi Gras Parades
- Championship golf courses
- Minor League Baseball
- Museums and historical sites
- Casino resorts complete with spas
- Only a 90 minute drive from destinations like Pensacola Beach, FL, and New Orleans, LA
